

Description

FORCE SYNTHETIC CHAIN OIL is a synthetic fluid with high thermal stability, to be used in chain conveyors working at very high temperatures. It provides an excellent protection against oxidation and corrosion at high temperatures. FORCE SYNTHETIC CHAIN OIL has very good anti-friction and anti-wear properties. It can be applied with a brush or through automatic systems.

Application

It is highly recommended for use in all types of chains, conveyors in a wide variety of industries, such as steel and textile industries, wood and fiber board manufacturing industries, in general for most types of ovens.

Charateristic

1. Excellent protection against oxidation and corrosion.
2. Good in high temperatures.
3. Excellent anti-friction and anti-wear properties.
4. No Residue and less carbon
5. Low odor

Typical Characteristics:

- Colour	1.5
- ISO Viscosity grade.....	320
- Kinematic Viscosity at 100 °C, cSt.....	30
- Viscosity Index.....	156
- Flash Point, °C	240
